REASONS FOR ALLOWANCE

Applicant's election without traverse of Species A (claim 3) in the reply filed on 05/20/05 is acknowledged. However, claim 3 (Species B) is no longer withdrawn from consideration because it depends on the allowed generic claim 1

The following is an examiner's statement of reasons for allowance:

Claim 1 is allowed over the prior art of record because none of the prior art discloses or suggests a transfective liquid crystal display having the feature "*the counter electrode substrate has a convex for making a thickness of the liquid crystal layer smaller in the reflection region than in the transmission region, and an end of the convex on a downstream side along the rubbing direction is disposed in a position shifted toward an upstream side along the rubbing direction relatively to the reflection pixel electrode part*". Claims 2-6 are also allowed since they depend on the allowed claim 1.

Fujimori et al'244, Fujimori et al'551 (both cited by Applicant) and Tanaka et al all disclose a transfective liquid crystal display having the counter electrode substrate which has a convex for making a thickness of the liquid crystal layer smaller in the reflection region than in the transmission region, not the feature "*an end of the convex on a downstream side along the rubbing direction is disposed in a position shifted toward an upstream side along the rubbing direction relatively to the reflection pixel electrode part*".
